## SKILLS

- Project oversight
- Resource planning
- Optimization of supply chains
- Inventory management strategies
- Business analysis and data insights
- Data-driven decision making
- Process improvement strategies
- Agile frameworks
- JIRA tracking
- SAP S/4HANA and IBP solutions
- API integration
- Cloud services including AWS
- SQL and Tableau
- Power BI analytics solutions
- Management of stakeholders
- Project management
- Data analysis
- Strategic planning
- Software testing
- Inventory optimization
- Product lifecycle management
- Systems implementation
- Artificial intelligence integration
- AI/ML
- LLM
- Agentic AI

- Led migration of on-prem systems to AWS cloud infrastructure, optimizing scalability and reliability
- Streamlined operational processes through automation, system integration, and data-driven decision making
- Oversaw supply chain systems including carrier management, inventory tracking, and order fulfillment workflows

August 2011 - May 2013

**Software Test Engineer Infostretch**

- Developed automated test scripts to enhance product quality using advanced testing methodologies
- Executed manual and automated testing processes to ensure quality standards.
- Reduced defects and enhanced application performance through systematic QA processes
- Developed comprehensive test plans for various software applications.
- Collaborated with developers to identify and resolve software defects.

January 2009 - July 2011

**Software Test Engineer Trump Entertainment Resorts**

- Developed and executed comprehensive test plans for software applications.
- Designed test strategies and executed SQL-based data validation to enhance system reliability
- Collaborated with development teams to identify and resolve software defects.
- Utilized automated testing tools to enhance testing efficiency and accuracy.
